

FEWS news: issue 3, 2019

Dear Delft-FEWS user,

In this special FEWS newsletter, we proudly present our new interactive [Delft-FEWS portal](#) with the latest Delft-FEWS news from around the world. The new portal has been launched during the [Dutch Delft-FEWS User Day](#) in June of this year. Because of its new interactive functionalities, the portal better facilitates the Delft-FEWS community to come together online to share news and build working relationships.

Once you are logged in, the [forum](#) is the place to go for user-generated content, like problem-solving solutions and community-related discussions. In addition to this, the portal offers news, blogs, new ideas, and best practices.

You can also upload your own [blog](#), a [new idea](#) or [best practice](#). The team of FEWS moderators is available during working hours for support. If you would like to share a [news](#) item or publish an upcoming [event](#), such as the [Delft-FEWS International User Days 2019](#), just send an email to fews-moderators@deltares.nl.

Please scroll down for an overview of the recently published Delft-FEWS news articles or go directly to the [Portal](#).

The Delft-FEWS moderators (from left to right)
Ilonka, Martijn, Aashish, and Arjen

Are you ready to get involved?

Best regards,

FEWS Glasgow wins Innovation Award

FEWS Glasgow, a pilot project aimed at providing surface water flooding and impact forecasts for the 2014 Commonwealth Games in Glasgow, has won the 2018 Innovation Award of the Royal Meteorological Society of Scotland. [Read more...](#)

Successful Dutch Delft-FEWS User Day

On the 18th of June we had another successful event of the Dutch Delft-FEWS User Day. With over 60 participants there were interesting presentations and discussions about the main theme: “Operational water management during extreme weather conditions”. [Read more...](#)

FEWS WMS with multiple forecasts per layer

Recently I have been working on adding support to the FEWS WMS service for visualizing multiple forecast times for a WMS layer. The WMS service as available in 201702 and 201802 will always display the current (most recent) forecast. With 201902 it will be possible to visualize older forecasts as well. [Read more...](#)

A new FEWS application in Serbia

The Republic Hydrometeorological Service of Serbia contracted Deltares for the development of another Delft-FEWS based forecasting application, in addition to the Sava Forecasting and Warning System they already use. The new project aims at building a forecasting system for the Velika Morava river basin. [Read more...](#)

Download presentations from past events in only 3 clicks

Did you know that the presentations from past events can be found with the individual events? Click on the event page, find your event and download the presentation you are looking for. [Read more...](#)
